

CENTER CONSOLE TRAY AND DOOR POCKETS

Two handy items to keep necessities conveniently within reach. The Console Tray (above) is centrally located atop the air conditioning control panel. Door mounted pockets (below) have a red fluorescent glowstrip to warn rear approaching nighttime drivers when door is open.

ADJUSTABLE ARMREST

People have different length arms and different comfort preferences. So this Volvo Armrest adjusts to different positions to suit your individual needs. Mounts between the bucket seats (themselves a legend in comfort) and operates with the touch of a button.

LOAD LEVELER

Both car and passengers ride best when the automobile is parallel with the road. The Volvo Load Leveler performs this bit of magic regardless of weight distribution within the car.

Two types are available. The automatic version has controls on your dash (shown above) for regulating the load leveling shocks through an air compressor. A manual version is operated by increasing or decreasing air at a special valve.

ON THE BACK

TOWING HITCH

If you're going to pull big loads, be sure you have one of these. The hitch is attached directly to the chassis, so the whole car does the work...not just the bumper. Will tow up to 2000 lbs. Your Volvo has already been electrically rigged at the factory to mate with the Volvo trailer wiring harness and adapter plug (not shown). Bar and ball can be removed when not in use as a safety precaution. Frame and hitch have been pre-drilled so that you may install this hitch yourself in ten minutes if you wish.

MIRROR EXTENSION ARM

Keep your eye on the load you're pulling by extending your mirror. Simply replace the standard mirror arm with this extension. Extended mirrors while towing required by law in some states.

VOLVO WAGON ACCESSORIES

MAKE YOUR LIFESTYLE MORE LIVABLE

The 1976 Volvo 245 and 265 Series automobiles are the result of years of careful evolution...evolution that has created a complete line of totally thought-out cars, from energy absorbing bumper to energy absorbing bumper. In between is a long list of standard equipment. Standard, because the thoughtful consumer expects not only a completely thought-out car, but also a complete car with equipment suited to his needs. Cars for people who think.

But not all people who think, think alike...or have the same kind of wagon requirements. If they did, these Volvo wagon accessories would probably be standard equipment. But they don't and these aren't.

What they are, is a group of intelligently designed wagon accessories for owners who do trail boats, carry loads or prefer to see America from 3 feet instead of 30,000.

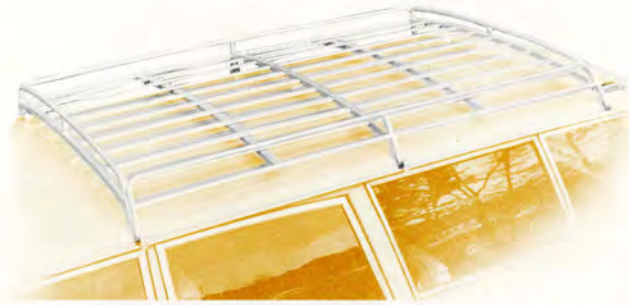

The following pages show the wide range of Volvo wagon accessories that will give you comfort and convenience inside while providing extra load room up top or letting you put it all behind you.

ON THE ROOF

PERMANENT WAGON ROOF RACK

You need space or you wouldn't have bought a wagon. With this rack you're ready for the big loads. Design is quietly integrated into the total profile. Dimensions are properly proportioned to the roof area. This is a tough one, chrome plated against the elements. You have a car that can really take it...so can this rack.

REMOVABLE WAGON ROOF RACK

Take this one off in minutes when you don't need it. Securely anchors to roof channels at six points with clamps and bolts. Available in easy-to-assemble kit form or can be completely installed by your Volvo dealer.

RAK PAK (for Wagon Roof Racks)

A zippered weatherproof container with hardboard bottom to protect your roof cargo from the elements. Folds down for easy storage. Tubular frame locks into position to form a rigid luggage compartment on your roof that is easy to load.

LUGGAGE NET AND CONTAINER

Elastic nylon Luggage Net holds loads firmly to all Volvo roof racks. Has twelve hooks to keep your cargo secure. Saves a lot of rope and a lot of time. A perfect complement to the Volvo Luggage Container (not shown), a zippered weatherproof bag that's plastic coated with welded seams for excellent weather protection.

INSIDE THE CAR

WAGON CARGO MAT

Protect the carpeting in your wagon's cargo area with this heavy duty, rubber-backed, vinyl mat. Shaped to fit interior contour. Keeps your wagon looking new.

VOLVO AUXILIARY SEAT

Lets your wagon grow with your family. Stores flush under floor when not in use, pops up when you need it. As a children's seat, it is equipped with seat belts, head rests and arm rests. Meets all Volvo and government safety standards.

HEAD RESTRAINT CUSHIONS

Comfortable and cool over the long haul. Foam padded cushion slips over head restraint and zips securely in position in seconds. One pair to a set. Completely washable black fabric.
