

Spoiler Volvo 240/260, 140, 120/130 and 66

“A spoiler improves fuel consumption.”

That is the conclusion reached by the Swedish motoring magazine “Teknikens Värld” after testing cars with a spoiler—including Volvo. “Teknikens Värld” concludes:

“The result shows that the car runs better and more economically with a spoiler. At the same time the car looks more sporty without it, costing any extra.”

Long tests behind Volvo spoilers.

A front spoiler for instance gives your Volvo even better roadholding, particularly at high speeds. Test drives also show that a spoiler will increase top speed. That is one of the reasons why all competition cars are equipped with spoilers.

By lessening wind resistance the spoiler saves on fuel, provided of course, you don't change your driving habits.

A spoiler pays for itself, by lessening fuel expenses!

Use Volvo spoilers only.

Spoilers, like all accessories, should be approved by Volvo. So check that the Volvo R-sport symbol is on your spoiler.

You'll find Volvo R-sport spoilers for the Volvo 240/260, 140, 120/130 and 66. All easy to fit.

Equipment for the Car Enthusiast.
