

Volvo Sports Wheel

Fully approved steering wheel for sportier driving.

The winner of the 1977 Swedish Rallycross Championship Per Inge Walfridson says of the new steering wheel: "I've used it in competitions the whole year, and I'm very satisfied. The rim is thick and the grip feels perfect."

The sports steering wheel comes in two variations. One with three spokes and one with four.

The three-spoked one, with a diameter of 350 mm, is made with different fittings and is therefore suitable for the Volvo 121/122 S, the 140/160 and the 240/260, up until the '78 models.

The four-spoked one, with a diameter of 380 mm, is suitable for all 140 and 160 versions of

1973 models and later. And also for the 240/260, up until the '78 models.

The steering wheel is hand-made from the finest material and has a leather finish of the highest quality. It meets all the requirements demanded of a competitive steering wheel.

Besides fulfilling all the other safety requirements, it also has a centre that collapses on impact. An important safety detail for those who like sporty driving.

Equipment for the Car Enthusiast.
