1. The Volvo 144 de Luxe offers even more comfort this year with a totally new and highly efficient heating and ventilation system. Durable and attractive vinyl upholstery and wall-to-wall carpeting in attractive colours.

2. The Volvo 145 de Luxe is one of the best looking and most spacious estate cars available. The tailgate opening is extremely large and the cargo area is now upholstered in hard-wearing, colour-matched textile.

3. The 144 Grand Luxe offering exclusive comfort and elegance combined with exciting performance. The seats and backrests have genuine leather facings. Wall-to-wall carpeting. Electronically-controlled fuel injection engine.

4. The Volvo 164/164 E is fast and imposing. The powerful, quiet-running, six-cylinder engine gives excellent acceleration and a minimum of gear-changing. The fittings and furniture of this car are in the same class: Genuine leather seat and backrest facings. 1973 models have a totally new dashboard layout and an equally new heating and ventilation system which is prepared for air conditioning.

5. The Volvo 1800 ES – an elegant, non-stop tourer. Electronically-controlled fuel injection engine gives sports car performance. Comfortable leather-faced bucket seats with built-in head restraints for comfort and safety.

6. The very large luggage area is fully carpeted. The "tailgate" rear window is frameless and gives excellent rearward vision.
